GOVERNOR GREG GIANFORTE • DNRC DIRECTOR AMANDA KASTER

Montana's Department of Natural Resources and Conservation (DNRC) works to help ensure Montana's land and water resources provide benefits for present and future generations. The agency's core services support the mission through communications, financial services, human resources, information technology and legal counsel. The agency also supports the Board of Oil and Gas Conservation.

COMMUNICATIONS

DNRC provides services to Montanans throughout the state related to forestry, fire prevention, financial assistance and water availability. Communications support through media relations, branding, newsletters, the website and more help share DNRC's story in a consistent and engaging way.

FINANCIAL SERVICES

DNRC procures needed fire equipment, provides financial grants and loans, and more across the state. Managing the budget effectively and efficiently is important to maintaining services.

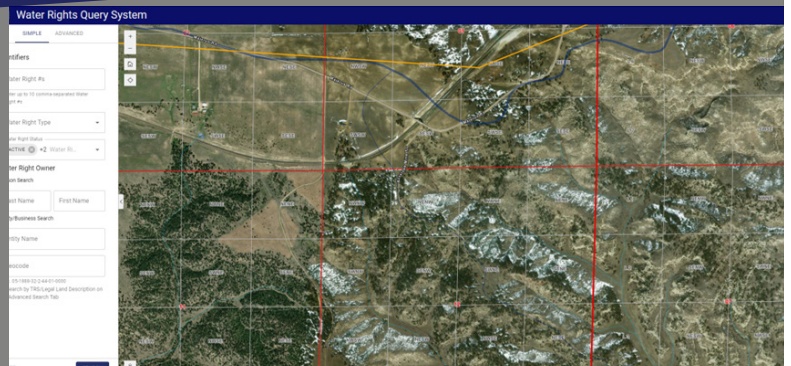

HUMAN RESOURCES

DNRC employs hundreds of employees across the state. Recruiting and maintaining talent is imperative to ensuring Montana's land and water resources provide benefits to present and future generations.

INFORMATION TECHNOLOGY

Sharing information on water rights, fire and more is important for transparent public information. Information technology plays a key role in providing up-to-date information to the public.

LEGAL COUNSEL

As DNRC provides regulatory and management oversight, as well as services across the state, legal counsel gives guidance and represents the agency in any legal matters.

BOARD OF OIL AND GAS CONSERVATION

The Montana Board of Oil and Gas Conservation administers state oil and gas conservation laws, regulates oil and gas exploration and production, and promotes conservation and prevents waste in the recovery of resources.
