Frequently Asked Questions

OVERLAPPING JURISDICTION

- Jurisdiction from all the different agencies overlaps, depending on location and project type
- No 1 permit supersedes others
- There are many instances where 1 project might require multiple permits

OVERLAPPING JURISDICTION

- Think of it like a Venn diagram

WHAT IS A CD'S ROLE?

- Use the Joint Application (Form 270)
- We all help each other out
- As a courtesy, direct applicants to other agencies. BUT, make sure to remind applicants that it is not your decision and they are responsible for checking with the other agencies.

RESOURCES

FAQ 1:

Q: What happens if a project is modified by one agency?

A: The applicant must fulfill the requirements of each permit. If one permitting agency requires a change to the project, that change must be approved in each application.

FAQ 2:

Q: If someone is following the SMZ rules, do they still need a permit?

A: If the project is being conducted by a private entity on a perennially flowing stream, then yes. There is overlapping jurisdiction between a 310 permit and the SMZ law.

FAQ 3:

Q: Who is responsible for making sure the applicant gets all the correct permits?

A: The applicant is responsible for making sure they get all necessary permits. As a courtesy, you can point them in the right direction, but it is not your job to make sure they submit their application to the other agencies.

SUMMARY

- Jurisdiction of the 310 law overlaps with other laws
- The applicant is responsible for getting all necessary permits, but CDs can help point them in the right direction
