

CD RENTAL EQUIPMENT GUIDELINES

GOT EQUIPMENT?

It is always exciting when purchased equipment arrives at your Conservation District doorstep. Now it is time to put it to its intended use and rent it to local landowners. Before you begin renting, review the 10-minute training on Rental Equipment on CDB's website to make sure that your district is set up for success. This training will help ensure you have all the important processes and paperwork in place to administer a safe and profitable equipment rental program.

Within this document, you will find model rental agreements, checklists, and training resources that are meant to serve as examples and templates for your program but are not meant to be all inclusive to administer your program. You can adopt and customize these, or you can design your own. Regardless, make sure to have your rental agreement paperwork legally reviewed and in place prior to utilization. Contact your CD Specialist or insurance company for assistance in reviewing these documents.

Following are some other important considerations for your rental program.

Check-out, User Agreements and Proof of Insurance

Every user must sign a rental agreement and should provide proof of their own insurance. This is non-negotiable – liability is always a concern. Users should have, at minimum, the following coverage: **\$750,000 per claim and \$1.5 million per occurrence**. Remember, it only takes one incident to potentially ruin not only the CD rental equipment program, but the entire CD and its reputation. *Make sure that your CD is covered by your rental agreement and not just your insurance company!*

Importantly, every user should be aware of their responsibilities for the equipment once in their hands. Provide them with checklists and review rental requirements with them.

Equipment Transfers, Check-In, and Maintenance

Considering users typically need to rent equipment at the same busy times of the year, making timely transfers between users is crucial. It is important to check-in equipment between users to ensure the equipment has not been damaged and maintenance is not required. Maintain a system for efficient scheduling of equipment whether it is an online tool or a simple calendar.

It is best practice to require equipment be returned to the CD between lessees, unless a user-to-user transfer is planned and approved in advance. If your CD does not require that equipment comes back to the CD doorstep in between uses, make sure that you are still getting signed agreements and proof of insurance from each user (see above). Regardless, do not allow equipment to trade hands without your knowledge.

When equipment is returned, use a checklist to inspect the equipment for damages and needed repairs. Checklists are not only important for equipment maintenance, but they can also settle disputes when equipment is returned in poor condition. Checklists should be completed, even if equipment does

CD RENTAL EQUIPMENT GUIDELINES

not return to town, and users should send photographs of any issues and the starting odometer to the CD when they receive equipment not after starting use. Also, make sure to have a policy and fee schedule in place to recoup fees outside of the regular rental agreement.

Summary

Remember, CD rental equipment is for local landowner use, *not abuse*. Rental equipment programs are a privilege to the landowners, *not an obligation*. Ensuring that your rental equipment program runs as smoothly as possible is a big part of the long-term sustainability of your program. Therefore, any short-term enforcement of rules that you do with an individual user benefits everyone else in your community in the long-term.

Lessee agrees that it shall be conclusively presumed, as between Lessor and Lessee, that Lessee has fully inspected and acknowledged that the equipment is in full compliance with the terms of this agreement, in good condition and repair, and that Lessee is satisfied with and has accepted the equipment and returned the equipment in such good condition and repair. Lessor shall have the right at any time to enter the premises occupied by the equipment and shall be given free access thereto and afforded necessary facilities for the purpose of inspection.

(a) To declare the balance of the rental payable hereunder to be due and payable whereupon the same shall become immediately due and payable; and

(b) To retake and retain the equipment without demand, notice or legal process, free of all rights of Renter, in which case Renter authorizes the Owner or its agents to enter upon any premises where the equipment may be found for the purpose of repossessing the same. Renter specifically

RCCD NO-TILL DRILL LEASE PROGRAM INFORMATION

1. A **contract** needs **to be signed** and **\$500 deposit left in office** before moving and using the drill. Proof of equipment rental insurance must be on file in office prior to use of the No-till drill.
2. Use will be allowed in fields with an NRCS determination. Fields without an NRCS determination will be approved on a case by case basis after physical inspection.
3. **Transport** with a **heavy-duty ¾ ton pick-up** or larger, avoid sharp corners with bumper mounted hitch. A flagger either before, after or both will be utilized.
4. **Transport at 25 mph** with “oversized load” signs on drill and on flagman vehicle.
5. **ALWAYS turn the knob on the right rear drive wheel to the unlocked position** when moving drill on road or short distances.
6. With the drill should be an operator’s manual and seed opener depth adjusting tool (refer to photo in the operators manual for use). If not there, check with the previous user.
7. It is strongly recommended to **pull drill** with a **100 hp or larger tractor**.
8. **Drill is equipped with Pioneer male hydraulic hose ends**, the producer is responsible to furnish any adapters if needed.
9. Other than John Deere tractors “CLOSE” the valve with the tag on it. When using newer John Deere tractors turn “OPEN” both valves.
10. Apply active hydraulic downforce, pull ahead 20 feet, stop and put tractor in park. With hydraulic downforce still engaged get out and check several gauge wheels to ensure firm contact with the ground, you shouldn’t be able to rotate gauge wheels by hand. Increase down pressure on control valve on drill to get desired contact. In moist conditions excessive downforce can cause compaction that will hinder root growth so don’t apply more pressure than is required to firmly contact gauge wheels with soil surface.
11. Turn wheel drive control knob on right rear wheel **to engaged position when you are ready to seed**.
12. Use the special tool to change the depth control on the openers, be sure to adjust openers on both front and rear gangs uniformly.
13. Each depth change notch equals about 7/16”, **use 1st or 2nd holes for grass or alfalfa seeding**, or about 5/8 or ¾” deep.
14. **Recheck seed placement depth** when **changing fields** or **different soils**.
15. The middle or **smaller box** is used for **smallest seeds**. The **front box** is used for **grain and grass seed**. The **rear box** is used for **fertilizer**.

16. ***USE THE SEED CHART ON OUTSIDE OF OPERATORS MANUAL for MAIN SEED BOX. Drill is NOT equipped with a ½ speed. This chart is different than what is indicated in the seed box and/or equipment manual.
17. Use the **standard setting** for the **small box** and **fertilizer boxes**.
18. It is best to check **seed cups** and **hoses** for **obstructions before setting seeding rate and filling with seed**.
19. Some **zerks need greased every 5 hours and some every 10 hours**. Use **NON-CLAY grease only**. Grease the openers and drive chains every 50 hours.
20. If you get stuck **do not raise openers** as this could cause support wheels to sink in deeper, also **don't back up**, as this will plug the openers.
21. **NO 90-degree turns** or **sharp turns with openers in ground**, it works best to seed back and forth lifting openers at end of each pass.
22. **CLEAN LEFTOVER SEED AND DIRT FROM BOXES WHEN DONE** –Seed and dirt tend to transfer between boxes regardless of which box was used. Clean all boxes. There will be a fee of \$50/hour for CD staff to clean the drill, and travel will also be charged.
23. **YOU MUST CONTACT A SUPERVISOR OR ADMINISTRATOR WHEN YOU ARE FINISHED WITH THE DRILL.**

Drill Calibration Instructions

Bulk seed X lbs/acre x 16oz/lb=_____Total oz

Total oz/ (divided by) total openings on drill = ounces per opening
43,560 sq ft per acre(divided by) width of drill= distance to travel

Example

User wants to seed 8lbs/acre using a 15' drill with 7" spacing
8lbs/ace x 16 oz/lb= 128 total oz

128 total oz/ 24 openings= 5.3 oz/opening

43560 sq ft per acre/ 15' drill = 2904'

User would need to get 5.3 ounces in a distance of 2904'. User could divide each number by 4 or 5 so they don't have to drive so far. Just make sure to divide both numbers by the same number.

Drill Cleaning

User must clean the drill out thoroughly. This means vacuuming out the bins and then driving forward to loosen the seed/fertilizer up and vacuuming it out again. The bottom of the fertilizer box is able to unlatch to release any excess fertilizer left in there. Also, make sure the seed is out of the tubes as well. All boxes need to be cleaned, even if all the boxes were not used. The drill MUST be power washed before returning it.

If the drill comes back with seed/fertilizer in the bins or if it is not power washed, you will be charged a minimum of \$50.00 plus an hourly rate to have it be cleaned. Your deposit will not be returned until the additional fees are paid. If not paid within 10 business days, the additional fees will be taken out of the deposit before it is returned.
