

# OWNING PROPERTY IN FLOODPLAINS

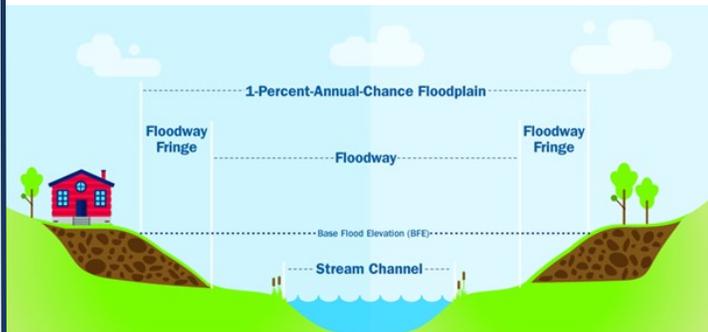

## Owning property in a FLOODWAY

A **Floodway** is the area within the floodplain that must be free from new development, so the 1% annual chance flood (100-year flood) can occur without substantial increases in flood heights. The **Floodway** will typically see the highest and deepest water during a flood event.

### Development Regulations

Broadwater County requires floodplain development permits for construction in the 1%- Annual Chance floodplain to protect human life and property.

Most communities in Montana strictly regulate development in a **floodway** to protect human life and property. New building construction is not permitted in the floodway. Improvements to existing structures in a **floodway** must obtain a Floodplain Development Permit.

### Insurance Requirements

Lenders will typically reevaluate their loans to reassess flood risk when a new map goes effective. If you own a building in a high risk flood area and have a federally backed loan, your lender will require you to have flood insurance, because the flood maps indicate a high flood risk.

FEMA's new rating methodology, Risk Rating 2.0, considers specific characteristics of a building to provide a more modern, individualized, and equitable flood insurance rate:

#### WHERE It Is Built (Property Address)

#### HOW It Is Built (Building Characteristics)

#### WHAT Is Built and Covered (Replacement Cost and Coverage)

If you own a building in the 1%-Annual-Chance-Floodplain including the floodway contact your insurance agent about flood insurance .

Preliminary floodplain maps must still go through Public review and are not yet effective.
