Fort Peck- Montana Water Compact (85-20-20, MCA)

The Compact provides for a total combined diversion of surface and groundwater of 1,050,472 AFY or a consumptive use of 525,236 AFY. In general, the compact:

- Authorizes Missouri River and any tributary flowing adjacent or through the Reservation (excepting the Milk River) as a source for the tribal water right.
- Provides for a Joint Tribal-State Board to resolve any disputes between tribal and non-tribal users.
